

CFM P "Performance Package"

Shortens cylinder processing time by up to 20%

The **Performance Package** increases CFM P cylinder output by up to **20%**. All CFM Ps built from 2009 on can be retrofitted to use this new **Performance Package**.

Your advantages:

- 20% faster cylinder processes (without side processing)
- 1500 rpm / cylinder speed for the highest cutting performance
- 600 rpm / grinding stone speed for the shortest grinding processes
- Very precise cylinder geometry
- Improved algorithm for rotational variants
- Implementation of new grinding programs
- 50% faster cylinder speed (up to max. 1500 rpm)
- 71% faster stone drive (up to max. 600 rpm)

Configuration / Set up:

- **HelioGrind®** HG 800e / HG 2500e *
- **HelioFace T-CUT** CFM face cutting tool for high performance *

Optionally available:

- EasyLock CFM Body with various tools e.g. HelioFace T-CUT, R-CUT or Steel-CUT™ (Please find more information in a separate data sheet)

Scope of upgrade

- Cylinder drive with new gear ratio
- Polishing stone drive with max. 600 rpm
- New software version
- New algorithm for rotational variants
- Optimized grinding program adapted to your needs
- Newly developed vibration damper

We would be pleased to offer you a tailor-made quotation for **Performance Package** installation so that you benefit from a **20%** performance increase of your CFM P.
