

## Filter Cartridges

Fine filter for grinding water

In order to maintain a high polishing performance level, suitable filter cartridges for filtering the grinding water should not be forgotten.

Our filter cartridges are ideal for this purpose. Our proven filter cartridges filter fine particles of corundum and copper debris out of the water cycle. The water is so clean after filtration that a stable polishing process can be ensured.

### Features

- Best filtration results
- Unbeatable value for money
- Consistent quality
- Washed

### Our recommendation

Based on experience, we recommend changing the filter cartridges at least once a week.
