

## HelioFilter Band

Daetwyler Graphics Filter Material for Band Filter System

In order to maintain clean cutting fluid, attention should be paid to the correct quality and function of the filter material.

We recommend HelioFilter Band from Daetwyler Graphics.

Our HelioFilter Bands are used on the CFM and FINISHSTAR band filters to filter the cutting fluid.

### Features

- HelioFilter Band 60: Medium flow / high filtration
- HelioFilter Band 40: High flow / medium filtration
- Unbeatable value for money

### Our recommendation

The FINISHSTAR requires a minimal amount of water so that a slightly finer filter material is recommended, HelioFilter Band 60.

For the band filter at the CFM, we recommend HelioFilter Band 40 to be able to optimally filter the larger amount of water.
