Rz-Printer

Mobile roughness printer

The Rz-Printer is a valuable addition to the Rz-Star roughness measurement device. You can remotely print out measured results as well as roughness profiles and measuring conditions. The device is battery-powered and can therefore be taken wherever you need it.

The paper replacement is also very easy: Open cover, insert roll of paper, close cover, done...

Features

- High availability – Up to five rolls of paper can be printed with one battery charge
- Robust casing for industrial use
- Wireless – Bluetooth®
- Standardised paper rolls
- Easy paper loading

Scope of supply

The device comes as a complete set in a high-quality case including a comprehensive written instruction manual. Besides the set includes the following:

- Rz-Printer
- Charging device/adaptor
- Battery pack
- Rolls of paper
